PATIENT

SELF-SERVICE IVR

Inbound Self-Service Voice with Patient Engage

Deflect inbound calls using Contact Center's Interactive Voice Response (IVR). IVR uses input supplied by the patient (patient ID, date of birth, etc.) to look up information with NextGen and fulfill simple patient requests like appointment settings. This allows for the overall number of calls to be decreased, allowing healthcare staff to focus on addressing more complex patient inquiries.

Automated outbound notifications with Patient Notify

Reduce patient no-shows by automatically sending voice, text, and email notifications based on real-time EHR events such as upcoming appointments, prescription refills, and outstanding bills. Allow patients to respond to notifications with a simple confirmation or let them connect to a member of your healthcare organization.

HOW MUCH CAN INTERMEDIA CONTACT CENTER + NEXTGEN SAVE YOU?

Patient Assist

If you are

- Managing 75 calls a day
- Spending 43 seconds for patient verification

Reducing patient verification from 43 seconds down to 3 seconds using Patient Assist could free up 5 hours and 50 minutes a week!

Patient Engage

If you are

- Managing 75 calls a day
- Average handle time on healthcare calls is 7 minutes

Reducing calls by 70%¹ could free up over 6 hours in just one day!
